The event is scheduled to end at 4:30 PM.

Let's begin. Mr. Okamoto, please.

**Okamoto:** Hello everyone. I am CFO Okamoto. Thank you very much for joining us today.

Let me quickly move on to an explanation of our business performance. Unless otherwise noted, we will explain on a consolidated basis, thank you.

## Net sales

## Operating income

## Ordinary income

## Net income attributable to owners of parent

First, please see page four. I will now explain the current period's profit and loss situation.

In Q3 of the current fiscal year, net sales increased 6% from the previous year to JPY1,443.5 billion and operating income increased 3.7% from the previous year to JPY106.5 billion. Net income for the quarter was JPY76.1 billion, down 0.9% year on year.

While operating income increased, net income for the quarter decreased due to an increase in interest expenses on borrowings, as well as the absence of a JPY1.1 billion gain on sales of securities and extraordinary gains recorded in the previous period. We will explain in detail by segment later.

Next, please see page five. Operating income for the period was JPY106.5 billion, an increase of JPY3.8 billion from JPY102.7 billion in the previous period.

The following is an explanation of each factor. First, in the construction business, gross profit declined by JPY1.8 billion due to a decrease in gross profit margin caused by soaring material and labor costs, in addition to a decrease in the amount of completed construction contracts.

In the real estate leasing business, higher gross profit was driven by an increase in the number of units under management, contributing JPY4.4 billion, while occupancy rates remained at the same level as the previous year.

In the real estate development business, the increase of JPY10.5 billion was due to the consolidation of Ascot from April, as well as steady growth in the business of buying and reselling existing properties.

In other businesses, the gas supply business increased by JPY1 billion due to steady growth.

SG&A expenses increased by JPY10.3 billion due to the impact of base increases, stock grants to employees, and the consolidation of Ascot.

## Profit & Loss by segment (Construction business - 1)

Please see page six. In the construction segment, construction work completed decreased by 0.7% from the previous period to JPY398 billion, and operating income decreased by 15.1% to JPY31 billion, mainly due to lower gross profit on completed construction contracts and higher labor costs resulting from base increases.

## Profit & Loss by segment (Construction business - 2)

|                         | 2024/12 | 2025/12 | (YoY)   |

### Gross profit margin / Operating income margin

#### Major breakdown of the variance (Δ0.2p YoY)

|                       |       |

| 2. Labor cost         | Δ0.9p |
| 3. Material cost      | Δ1.1p |
| 4. Imported materials | Δ0.7p |

Please see page seven. The gross margin ratio decreased by 0.2 percentage points from the previous year to 25.1%.

Here we outline the breakdown of the decline in gross profit margin. As stated, while price revisions had a positive effect, this was offset by rising labor costs, primarily for electrical and plumbing installers, coupled with the ongoing impact of increased material costs, such as ready-mix concrete and structural panels.

DAITO TRUST CONSTRUCTION CO., LTD.

©2026 Daito Trust Construction Co., Ltd.

Please see page 11. The gross margin ratio decreased by 3.1 percentage points from the previous year to 21.4% due to the impact of the mark-to-market valuation of real estate held for sale associated with the consolidation of Ascot, which we have discussed in Q1 and Q2.

SG&A expenses have increased alongside business expansion. Although operating profit grew at a faster rate than the SG&A expenses, the ratio of SG&A expenses to sales has declined.

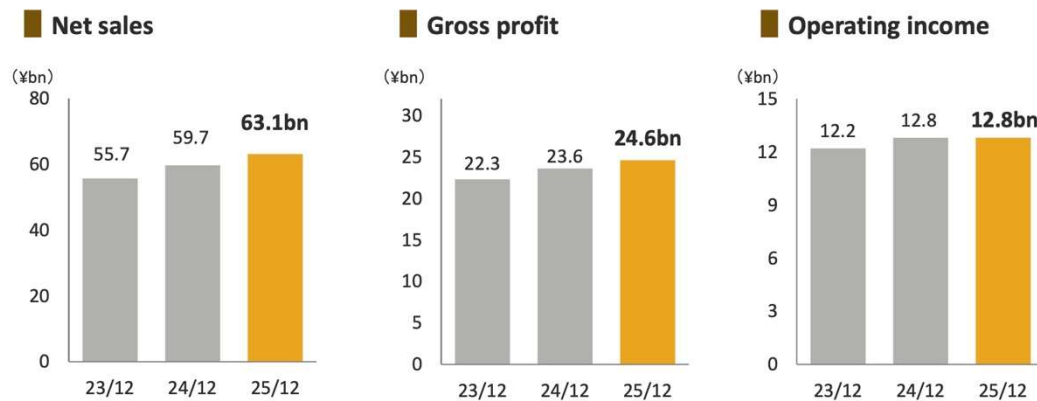

As a result, the operating income margin was 10.8%, the same level as the previous year.

Please see page 14. As for the financial situation, while current assets, mainly real estate for sale, have been increasing due to the steady progress of the real estate development business, the Company has taken out loans to cover the acquisition of such properties, which means that long-term liabilities have been increasing.

Assets related to real estate for sale will be explained later.

Both net sales and operating profit are projected to increase by JPY10 billion, with net income expected to rise by JPY5 billion. Other items are as stated. The primary factors driving this forecast are: first, the maintenance of high occupancy rates in our real estate leasing business; and second, the steady progress of projects within our real estate development business.

As announced today, the Company will also repurchase its own shares up to JPY25 billion.

This concludes our explanation.
