Daito Trust Construction Co., Ltd.

Daito Trust Construction selected for the first time in the Environmentally Sustainable category at the 7th ESG Finance Awards Japan

Recognized for its management strategies aimed at realizing a sustainable society and for transparent disclosure

On February 16, 2026, Daito Trust Construction Co., Ltd. (head office: Tokyo, Japan) was selected for the first time as one of the companies in the Environmentally Sustainable category at the 7th ESG Finance Awards Japan.

The category of Environmentally Sustainable recognizes companies with the aim of providing investors and businesses with practical examples of those that incorporate important environmental opportunities and risks into their management strategies. Selection is based on an evaluation of the extent of a company's disclosure of risks, business opportunities, strategies, key performance indicators (KPIs), and governance with regard to important environmental issues. We were selected this year in this category in recognition of the comprehensive nature of governance and disclosure across our environmental management efforts.

We promote sales of ZEH rental housing and LCCM rental housing development in the area of decarbonization. In the area of biodiversity, we verify the sustainability of procured lumber, and have formulated our exterior landscaping concept for ecosystem protection, known as Meguru Tomarigi. Our initiatives in the area of recycling include measures to continually improve the recycling rate. We believe these efforts contributed to our recognition in this category.

Following this selection, we will continue to enhance our initiatives in environmental, social, and governance (ESG) fields as a company that supports affluent lifestyles. Seeing changes in society as an opportunity for growth, we will continue collaborating with our stakeholders to advance our business activities while realizing a sustainable society.

■ About the ESG Finance Awards Japan

The ESG Finance Awards Japan is an initiative administered by the Ministry of the Environment to recognize and commend businesses, financial institutions, and other organizations whose proactive and innovative activities in ESG finance, as well as environmental and social businesses have made a social impact. Since its inception in FY2019, this initiative has been implemented to promote and expand ESG finance with the aim of realizing a decarbonized and sustainable society. Companies chosen in the Environmentally Sustainable category are recognized for enhancing corporate value by integrating important environmental opportunities and risks into their management strategies.
